## PROJECTS

---

- **Minor Project**

**Duration:** August 2023 - November 2023

**Description:** This project proposes a IoT-based smart attendance system that leverages facial recognition techniques on mobile devices for accurate and efficient attendance tracking.

**Role:** responsible for Front-end, Backend coding and database management.

**Technologies:** Used Teachable Machine for creating machine learning classification models that can be customised without specialised technical skills and MIT App Inventor is a visual programming platform that empowers individuals, particularly those without prior coding experience, to create mobile applications for Android devices.

- **PGLife Website**

Developed a fully functional Hostel booking website using HTML, CSS, and JavaScript. Implemented user authentication, Rooms catalog, and functionality. Utilized MySQL for database management and Git for version control.

## TRANINGS

- **Web Development, Online**

**May 2023**

8 Weeks of Certified Training from Internshala Trainings

- **Internship and Job Preparation, Online**

**May 2023**

4 Weeks of Certified Training from Internshala Trainings
